L. C. SMITH GUNS NEVER SHOOT LOOSE

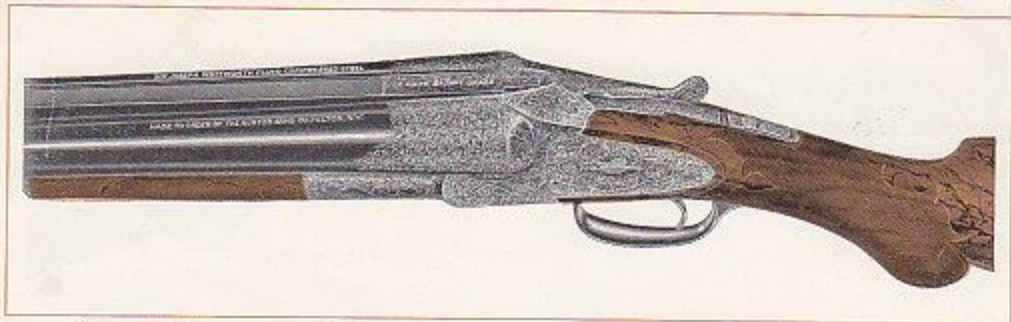

L. C. Smith Guns never shoot loose and are so guaranteed; this is due to the construction of the bolting mechanism. You will note by the cut that the bolt is built on a bevel; that it goes from one side of the frame entirely through the extension and into the other side, at the same time bolting over the end of the extension rib. The consequence is that the bevel of the bolt takes up all wear automatically and makes good our guarantee that *"The longer you shoot a Smith gun, the tighter it really gets."*

THE LOCKS: The Locks of the Smith gun are very simple. It requires the removal of but one or two screws to get at the whole mechanism. There are but four pieces in the Lock; the Hammer, Sear, Bridle, and Main Spring. These parts are large and well proportioned and are so constructed that the wear is taken up automatically.

The action of the Hammer is lightning fast and hits the firing pin dead on the head.

L. C. SMITH DE LUXE GUN

GAUGE: 12, 16 or 20. **BARRELS:** 26, 28, 30 or 32-inch Whitworth Fluid Steel, bored to order from full choke to cylinder. **WEIGHTS:** 12-gauge, 6 pounds 6 ounces to 8¼ pounds; 16-gauge, 6¼ to 7 pounds; 20-gauge, 5¼ to 6½ pounds; .410-caliber 5¼ to 5½ pounds. **GRIP:** Pistol or straight. See price-list.

A gun of exquisite detail and superb workmanship; the last word in the gun maker's art. The ornamentation in gold bas-relief and the finest work that engravers can produce give to this gun an elegance and refinement that is equalled only by its shooting qualities. A "Made to Order" product in which the individuality of the purchaser will be carried out.

The barrels furnished as specified are from the best steel manufactured and are in complete harmony with the refinement of this gun. They are possessed of remarkable tensile strength and as bored by us assure absolute perfection.

Quality is the impressing feature of the hand-wrought Circassian Walnut stock, especially selected for its texture and grain, and accorded a finish in design and richness that can only be perfected by the skill of workmen of many years' experience.

A Thoroughbred in Style and Durability

L . C . S M I T H E A G L E G U N

GAUGE: 12, 16 or 20. **BARRELS:** 26, 28, 30 or 32-inch Nitro Steel, bored to order from full choke to cylinder.
WEIGHTS: 12-gauge, 6 pounds 6 ounces to 8½ pounds; 16-gauge, 6¼ to 7 pounds; 20-gauge, 5¼ to 6½ pounds;
.410-caliber, 5¼ to 5½ pounds. **GRIP:** Full-pistol regular, half or straight to order. See price-list.

For the sportsman who desires a gun of unexcelled shooting properties and unusual decoration, we would suggest the "Eagle." Manufactured throughout from the finest materials, it ranks among our most popular "service" guns—the kind that does the execution and does it right.

The decoration, while not elaborate, is of a nature to give the whole gun an air of distinction—a style that classes it far above the usual. On the left lock-plate is engraved a ring-necked pheasant in bold relief against a frosted background; and on the right, a duck in full flight. The top and bottom of the frame are ornamented with scroll work of artistic design.

The celebrated Nitro Steel barrels are used on this gun. Their efficiency and serviceableness have made them decidedly popular.

The stock is made of the finest walnut, and is finely finished.

A Gun with Shooting Power and Style

L . C . S M I T H F I E L D G U N

GAUGE: 12, 16 or 20. **BARRELS:** 26, 28, 30 or 32-inch Armor Steel only, bored to order from full choke to cylinder.
WEIGHTS: 12-gauge, 6 pounds 8 ounces to 8½ pounds; 16-gauge, 6¼ to 7 pounds; 20-gauge, 5¼ to 6½ pounds;
.410-caliber, 5¼ to 5½ pounds. **GRIP:** Full-pistol regular, half or straight to order. See price-list.

Especially designed to fill the increasing demand for an inexpensive, durable and plainly finished model, this gun has become very popular.

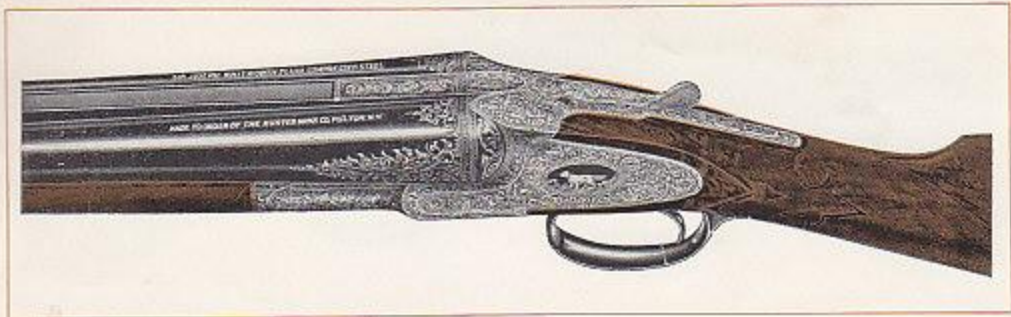

Thousands of the "Field" model are in the hands of hunters who declare its excellence as a gun for rough work. Where such service is required—in the timber and the brush—there the "Field" may be found, answering the trigger unflinchingly. As to shooting powers, it hits as hard and accurately as its more expensive brothers.

Armor Steel barrels, chosen because of their strength and uniformity, have much to do with the popularity of this model.

The stock is cut from a fine grade of walnut.

A Real Knock-About Gun

L. C. SMITH PREMIER GUN

GAUGE: 12, 16 or 20. **BARRELS:** 26, 28, 30 or 32-inch Whitworth Fluid steel, bored to order from full choke to cylinder. **WEIGHTS:** 12-gauge, 6 pounds 6 ounces to 8¼ pounds; 16-gauge, 6¼ to 7 pounds; 20-gauge, 5¼ to 6½ pounds; .410-caliber, 5¼ to 5½ pounds. **GRIP:** Pistol or straight. See price-list.

A Genteel Work of the Gun Maker's Art

The Smith "Premier" is the result of exceptional care in the selection of materials and the application of detail throughout. A quiet elegance surrounds its delicate engraving and the hunting dogs depicted in gold on both lock-plates.

Special attention is given to the selection and treatment of the barrels from the famous Whitworth Fluid Steel that there may be a positive factor in strength and shooting qualities.

The stock is Circassian Walnut. It is hand worked and finished in thorough keeping with the refinement of the entire gun.

The "Premier" grade includes your monogram engraved on a gold oval inlet in the stock.

Smith Barrels are Made of Armor, London, Crown and Nitro Steel

L. C. SMITH SKEET SPECIAL

"SKEET UPLAND SPECIAL" TRAP AND GAME GUN

GAUGE: 12, 16 or 20. **BARRELS:** 26, 28, 30 or 32-inch London Steel, bored to order from full choke to cylinder.
WEIGHTS: 12-gauge, 6 pounds 6 ounces to 8½ pounds; 16-gauge, 6¼ to 7 pounds; 20-gauge, 5¼ to 6¼ pounds.
GRIP: Full-pistol regular, half or straight to order. See price list. Made on special order in various combinations, including Ejector, One-Trigger, Beaver Tail Forend, Ventilated Rib and special stock dimensions.

A new gun for a new sport. An all season shot gun for an all season sport. Designed for the new game of Skeet. A strong durable gun especially suitable for Skeet and field shooting. A trap and game gun with barrels bored for this particular type of shooting. Stock and forend of selected walnut. The left lock-plate is engraved with Skeet symbol and the right lock-plate shows a partridge in full flight.

All the features of the more expensive models are built in the Skeet Special, including special boring and the famous rotary bolt originally patented by Hunter Arms Co. nearly fifty years ago.

L. C. SMITH SINGLE BARREL TRAP GUN

"SPECIALTY GRADE"

GAUGE: 12. **BARREL:** 30, 32 or 34-inch Nitro Steel, bored by the Smith System for perfection in trap shooting.
TRIGGER POSITION: Rear. All measurements regarding length of stock will be based on rear position of trigger.
STOCK AND FOREND from especially selected walnut. See price-list.

For nearly one-half of a century L. C. Smith Guns have "never shot loose" because of the strength and action of the Smith rotary bolt. This same original bolting mechanism is an outstanding factor in the strength of the Single Barrel. It will not shoot loose.

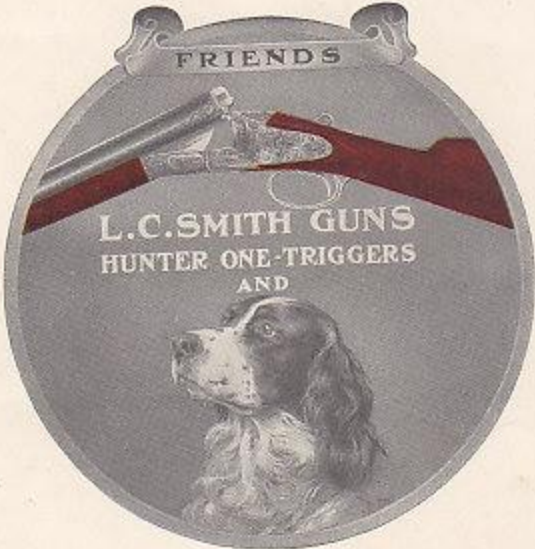

The L. C. Smith Single Barrel has the same large, well-supported bearings, a frame unexcelled in strength, the same cocking device, a quick action hammer that hits the firing pin dead on the head, and a never failing automatic ejector. Smith locks always work with remarkable smoothness.

The barrel is bored according to the Smith special system for trap shooting. It gives velocity, penetration and a wonderful pattern.

The Single Barrel Trap in our higher grades is made in the following: Specialty, Eagle, Crown, Monogram, Premier, De Luxe; for details of finish and decoration, see description of "double guns" in the respective grades.

All L. C. Smith Guns are Mechanically Correct
