Missing Aircrew Reports

The Missing Air Crew Report (MACR) was authorized in May 1943 to record the facts of the last known circumstances regarding missing air crews. The report was prepared by the unit usually within 48 hours after the aircraft loss, and then it was sent on to Headquarters, AAF. However, it should be noted that some MACRs were prepared after the war as needs dictated. These MACRs and their final content are set forth and described chronologically by dates. It is to be noted for the record that some of the MACR records are sketchy on some supporting details. In some cases, supplementary data was obtained through mission reports and other researcher sources.
