10 February 1945

XXV TAC DAILY INTELLIGENCE SUMMARY (Cont'd)

6. General Information

Credite to the 368th Group's 395th Squadron. Photographic interpretation reveals that its attack of 10 Feb on the BULLAY Bridge over the MOSELLE has knocked down one span and left another hanging. This bears out the pilots' claim that their 500-lb bombs hit the bridge, "knocking it into the water." Much bombed by medians and also by fighter-bombers, this bridge had borne a charmed life until the 395th Squadron's highly successful attack.

CHARLES W. HALLETT,
Lt. Col., Air Corps
AG of S, A-2
